CATALOGUE- WHAT'S NEW

FAST DELIGHT

Soak-off UV lacquer

Everybody's dream is to look beautiful easily and in no time. Today it is possible to have great nails in a flash thanks to the Gamax **Fast Delight** soak-off UV lacquers.

€16,70

HABANA LACQUER

Professional nail lacquer

The **Habana** lacquer (**Art. 1142**) is a state-of-the-art lacquer from the Gamax line. The light brown shade is perfect for an autumn/winter look. 14 ml. €3,90

UV TOP COAT

Sealer gel for nail enhancement

UV Top Coat (Art. 2068) is a sealer gel without dispersion film after UV polymerization (two minutes). Can be used on all types of nail extension and on colour gels. €12,80

EXTRALONG NAIL FILE

Professional Nail File grit 80/100

The **Extralong nail file (Art. 2927)** is a coarse-grain nail file, grit 80 and 100. It is ideal to shape hard gels and acrylic systems. Also available in 50-pack (**Art. 2928**).

€1,70(each)/€65,00 (by 50)

KOLINSKY NAIL BRUSH

Kolinsky sable-hair brush (**Art. 2752**). Natural wood handle, cats tongue tip. Measure # 2. It is ideal for 3D decorations with gel or acrylic. €3,60

NAIL GLUE

Instantaneous nail glue (**Art. 2402**) for tips. 15 gr-pack with application brush included. €7,50

PRODUCTS

UV GELS

Gamax offers a variety of UV gels for nail sculpting that comprises all the main products for the one-phase and the three-phase methods: sealers, adhesion promoters, builders, one-phase and colour gels. The different viscosity ranks and formulations make our products suitable for every need.

ADHESION PROMOTERS

- **Bonder – 15 ml – Art. 2013-** €35,00

Self-hardening adhesion promoter

Bonder is an adhesion promoter which requires polymerization under the UV lamp for 20 seconds. It is ideal for nail extension with tips. It contributes to protecting the natural nail and guarantees a solid and resistant adhesion.

- **Premiere – 10 ml – Art. 2012-** €19,50

Self-hardening adhesion promoter

Premiere is an adhesion promoter which does not require an UV lamp polymerization. It is indicated for nail extension without tip. It air dries in two minutes. It promotes a better adhesion of all gels on the natural nail surface. For a higher adhesion, we recommend not to apply too much product.

- **Primer – 14 ml – Art. 2038-** €13,90

Self-hardening adhesion promoter

Primer is a liquid adhesion promoter used for acrylic system. It guarantees a perfect adhesion of the acrylic system on the nail surface. Its formula does not contain acid and agent which can be harmful to the nail's health.

STRUCTURING GELS

- **Builder 15 gr – Art. 2005-** €33,50
- **Builder 50 gr – Art. 2006-** €83,00

Structuring gel of dense and solid consistency for three-phase method.

The **Builder** gel, being a modelling gel, needs a conscientious filing with a coarse-grain nail file (grit 100/180). It must be applied right after the first phase of the nail extension which requires the application of the adhesion promoter and a successive polymerization under the UV lamp. Once the lamp phase is completed, the dispersion film must be removed with a pad soaked in **Poligel**. The **Builder** structuring gel is extremely flexible and easy to apply, provided that the brush pressure is soft. The application of Builder must be steady so as to avoid the creation of furrows which would require even more care during the filing and the surface modelling phases. The **Builder** gel also requires a polymerization under the UV lamp and, thanks to its solid consistency, the gel can be applied on all fingers at once.

- **Extreme Builder 50 gr – Art. 2034-** €94,00

Structuring gel of dense and solid consistency for the three-phase method.

Extreme Builder is a structuring gel of dense consistency. Its formula makes it particularly adapted to nail extension with tips and nail forms. Its extremely hard consistency after polymerization under the lamp (2 minutes) requires a careful filing. Its consistency makes it quite heavy on the nail, this is why it is essential not to exaggerate on the quantities, especially on the borders and on the end of the nail. Being a little flexible gel, it tends to lift up near the cuticle area.

- **Extreme Pink Builder 50 gr – Art. 2035-** €94,00

Pinkish structuring gel of dense consistency for the three-phase method

Extreme Pink Builder is a pinkish structuring gel of dense consistency. Its formula makes it particularly adapted to nail extension with tips and nail forms. Its extremely hard consistency after polymerization under the lamp (2 minutes) requires a careful filing. Its consistency makes it quite heavy on the nail, this is why it is essential not to exaggerate on the quantities, especially on the borders and on the end of the nail. Being a little flexible gel, it tends to lift up near the cuticle area.

SELF-LEVELLING GELS

- **Monogel 15 GR – Art. 2001-** €32,50
- **Monogel 50 gr – Art. 2002-** €83,00

One-phase transparent gel for nail extension

One-phase transparent gel with medium density and of fluid consistency. Its fluidity makes it easy to use, simple to apply and perfectly self-levelling. We recommend to apply **Monogel** on one finger at a time in order to avoid it to stick on the cuticles. For an optimal application, it is recommended to do a first quick and thin layer and to leave a 2 mm margin from the border of the nail and to dry it under the lamp for a few seconds. Apply a second more abundant layer from the centre of the nail, trying to get a harmonious C curve. Continue this way for all fingers and polymerize for 4 minutes to increase the shining effect. Monogel can also be used as a structuring gel for the three-phase method and combined with **Bonder** and a **sealant gel**. **Monogel** adapts itself to flat nails when applied 2 layers at a time and it is important not to create too much thickness between the cuticles and the nail line. It is also indicated for extensions with nail forms by creating first the length (and polymerizing it for a few seconds), and then the structure. **Monogel** is perfect as a structuring base for coloured gels and is particularly “stable” during

polymerization by maintaining the shape obtained with the brush. Filing **Monogel** is very simple thanks to its flexibility.

- **Pink Unico 50 gr – Art. 2036- €94,00**

Self-levelling gel of fluid consistency for the one-phase method.

Pink Unico is a pinkish transparent gel of fluid consistency. It can also be used as a unique gel in the one-phase method and as a structuring gel for nail extension with tips or forms. We recommend to apply it on one nail at a time and to polymerize it for four minutes. If you want to file and seal **Pink Unico**, the time length under the lamp must be of 2 minutes. Long-lasting gel (3/4 weeks), Pink Unico is little flexible, this is why it is important not to weigh the nail down with too much product.

- **Super 1- 50 gr - Art. 2037- €94,00**

Self-levelling gel of medium-fluid consistency for the one-phase method.

Super 1 is a self-levelling gel of medium-fluid consistency for the one-phase method. Universal gel for all types of problems and nails. Application is quite simple and recommended on one nail at a time. Being self-levelling, it does not require filing and sealing if applied correctly. It is ideal for clients' nails with excessive hand perspiration. A too abundant quantity can weigh the nail down and increase the possibility of structure deformation during the polymerization process.

- **Unico- 50 gr – Art. 2032- €69,00**

One-phase gel for nail extension

Transparent crystalline one-phase gel with medium-fluid viscosity and quite flexible. The ideal application should be made as for Monogel, that is to say with a first thin application, 2mm from

the border of the nail and a brief exposure to UV ray, one finger at a time. Then, the creation of the C curve will have to be made on one hand at a time and polymerized for four minutes, two if filing and sealing are necessary. Like all one-phase gels, filing is not necessary if the application is made correctly. We recommend its use on thin nails ; it is particularly adapted to nails with “glass effect”. For extensions on flat nails, create the length first and then the structure. Do not exaggerate with the quantities near the borders because the heat and rays can extend the gel and deform it. In order to avoid the unpleasant burning sensation, the client must insert her hand gradually into the lamp.

SELF-LEVELLING COVERING GELS

- **Monorosé - 15 gr - Art. 2033- €32,50**

Pinkish self-levelling covering gel of fluid consistency for nail extension

Monorosé is a pinkish self-levelling covering gel of fluid consistency for the one-phase method. It is ideal for bitten or stained nails, or with a little limb. Being self-levelling, it does not require filing after a 4-minute-polymerization. If filing and sealing are necessary, the time of polymerization is reduced by half. It is applied on one finger at a time with one or 2 layers. Gel adapted to nail extensions with tips, to extensions with forms or to cover natural nails. It is also indicated for an elegant French effect. Apply near the cuticles so as not to highlight the difference with the natural colour of the natural nail.

- **Monomilky 15 gr - Art. 2039- €32,50**

Self-levelling covering gel of fluid consistency for nail extension

Monomilky is a milky white covering gel of fluid consistency for the one-phase nail extension. Self-levelling and easy to apply, it does not require filing to be shaped. It is perfect to cover little flaws on the nail surface. Apply on one finger at a time in one or two layers. Polymerization time in UV lamp is 4 minutes. If filing is necessary reduce by half. Be careful with the amount of product so as not to weight down on the nail, especially on the borders and on the end. Monomilky is a little flexible gel and moderately hard to file.

- **Monopink- 15 gr – Art. 2041- €28,00**

Pinkish self-levelling covering gel of fluid consistency for nail extension

Monopink is a light pink self-levelling covering gel of fluid consistency for the one-phase. It is ideal for bitten or stained nails, or with a little limb. Being self-levelling, it does not require filing after a 4-minute-polymerization. If filing and sealing are necessary, the time of polymerization is reduced by two minutes. It is applied on one finger at a time with one or 2 layers. Gel adapted to nail extensions with tips, to extensions with forms or to cover natural nails. It is also indicated for an elegant French effect. Apply near the cuticles so as not to highlight the difference with the natural colour of the natural nail.

FRENCH GELS

- **French White – 15 gr – Art. 2007- €35,00**

Gel of fluid consistency for permanent French manicure

French White is a gel for permanent French manicure of fluid consistency. It is easy to apply on the borders of the nail and requires an exposure to UV lamp for 240 seconds instead of the usual 120 seconds. After polymerization, it is not necessary to remove the dispersion film nor to file. French White must be applied harmoniously in order to avoid creating coloration areas less compact than others. **French White** is a very thin gel. This is why it can be used between a structuring gel and a sealant. This characteristic makes refill easier as the surface can be easily removed with a file. **French White** is not indicated for nail extension and it is recommended not to use on natural nails because of its thinness.

- **French Milky – 15gr – Art. 2009- €32,50**

Gel of fluid consistency for permanent French manicure

French Milky is a gel for permanent French manicure. The intense white milky colour allows to obtain a very natural and elegant result. The application of French Milky must be done with a steel

tip brush so as to avoid furrows and stripes which would damage the quality of the result. French Milky can be used on nail extensions with forms and tips and natural nails. After polymerization under the lamp for two minutes, it is not necessary to remove the dispersion film nor to file. French Milky gel's composition is particularly flexible.

SEALER GELS

- **Sealant – 15 ml – Art. 2014-** €35,00

Transparent sealer for nail extension

Transparent sealer gel of fluid consistency. It is particularly indicated for clients who prefer a colourless result. Like the Pink Sealer, it requires a polymerization under the lamp for two minutes and the removal of the dispersion film with Poligel.

- **Natural Sealant – 15 ml – Art. 2040-** €35,00

Opaque sealer gel of fluid consistency for nail extension

Opaque sealer gel of fluid consistency. Like the Pink Sealer, it requires a polymerization under the lamp for two minutes and the removal of the dispersion film with Poligel.

- **Pink Sealer – 15 gr – Art. 2003-** €29,00

Pinkish sealer gel of medium fluid consistency for nail extension

Pink Sealer is a pinkish sealer gel of medium fluid consistency. Its pale coloration gives a more natural brilliance to the nail surface. Pink Sealer perfectly seals the nail extension and guarantees a long-lasting protection. The application must be gentle so as to obtain a more brilliant result. It is recommended to apply a sufficient quantity of gel so the sealing does not become opaque. Polymerization time is two minutes. Remove the dispersion film with Poligel.

COLOUR GELS

Colour gels

Professional nail colour gels are ideal for the most creative and trendy Nail Artist. They are covering, elegant and sparkling for coloured nails to expose on every occasion. Colour gels require a polymerization in UV lamp. "Easy Remove" gels can be removed with a solvent.

COLOUR GELS COLLECTIONS

ER= *Easy Remove* colour gels

This collection is the heart of the colour gels line and proposes the main shades : from the most classic to the most original ones. Covering and shiny gels with a long lasting effect. €9,90

Shiny like no others, Gamax glitter gels can be used for nail extensions with forms directly on the natural nail. €9,90

The Pearl Collection is elegant and ideal for a refined work. €9,90

Bright and spring-like colours for the *Spring Collection* which recalls the charm of blooming fields. Indicated for a captivating nail art. €9,90

ROME COLLECTION

UV gels for nail extension

The **Rome Collection** is an easy-to-use UV gel line and it is also a tribute to the endless beauty of Rome. A new line which recalls the delicate colours of the infinite shades of marble, fountains and sunsets of the capitol. Even the incredible durability of the gels is appropriate for a city which has been resisting and renewing itself for thousands of years.

- **Barocco 50 gr - Art. 2044-** €69,00
- **Barocco 5 gr - Art. 2066-** €11,90

Transparent pinkish structuring gel of high viscosity for the three-phase method.

Transparent pinkish structuring gel of high viscosity for nail extension. It can be used with tips or with forms in the three-phase method. It requires a careful filing to be shaped. Professional use only : polymerization time : two minutes.

- **Navona 50 gr - Art. 2048-** €59,00
- **Navona 5 gr - Art. 2059-** €11,90

Opaque pink structuring gel of medium viscosity for the three-phase method

Opaque pink structuring gel of medium viscosity. It can be used with tips and forms in the three-phase method. Its creamy consistency makes its application very easy. Adapted to all levels. Polymerization time : two minutes.

- **Giulia 50 gr - Art. 2045-** €69,00
- **Giulia 5 gr - Art. 2067-** €11,90

Transparent self-levelling gel of medium-fluid viscosity for the one-phase method

Transparent self-levelling gel of medium-fluid viscosity. Very resistant with a good adherence on natural nails. It can be used in the three-phase method or as a structuring gel. It does not require filing or sealing when correctly applied. Adapted to all levels. Polymerization time: two minutes

- **Forum 50 gr - Art. 2050-** €59,00
- **Forum 5 gr - Art. 2061-** €11,90

Transparent pink self-levelling gel of fluid viscosity for the one-phase method

Transparent pink self-levelling gel of fluid viscosity. Long-lasting on nails. It can be used in the one-phase method or as a structuring gel in the three-phase method. Recommended for French gel. It does not require filing or sealing. Adapted to all levels. Polymerization time: two minutes.

- **Tiber 50 gr - Art. 2049-** €59,00
- **Tiber 5 gr - Art. 2060-** €11,90

Natural beige self-levelling gel of medium-dense viscosity for the one-phase method

Natural beige of medium-dense viscosity. Its creamy consistency makes its application very simple. It creates a full covering of the nail on which French style can be done. Adapted to all levels. Polymerization time: two minutes.

- **Capitolium 50 gr - Art. 2047-** €69,00
- **Capitolium 5 gr - Art. 2058-** €11,90

Dark pink flesh of fluid viscosity for the one-phase method

Dark pink flesh self-levelling gel of medium-fluid viscosity. Self-levelling and ideal for nail extensions with tips. The colour is similar to the nail bed's. It can be used to extend the nail bed and to totally cover its flaws. Flexible on the nail and extremely glossy after polymerization. Adapted to all levels. Polymerization time : two minutes.

- **Pantheon 50 gr - Art. 2046-** €69,00
- **Pantheon 5 gr - Art. 2057-** €11,90

Pastel pink self-levelling gel of fluid viscosity for the one-phase method

Pastel pink self-levelling gel of fluid viscosity. Self-levelling and ideal for nail extensions with tips. It can be used to extend the nail bed and to totally cover its flaws. Flexible on the nail and extremely glossy after polymerization. Adapted to all levels. Polymerization time: two minutes.

- **Trastevere 50 gr - Art. 2053-** €59,00
- **Trastevere 5 gr - Art. 2064-** €11,90

White French gel of fluid viscosity

White French gel of fluid viscosity. Ideal for French manicure. It can be applied on tips or on structuring gel. Adapted to all levels. Polymerization time: two minutes. Do not remove the dispersion film.

- **Trevi 50 gr - Art. 2054-** €69,00
- **Trevi 5 gr - Art. 2065-** €11,90

White French gel of fluid viscosity

French white gel of highly fluid viscosity for a more pronounced French. It can be applied on tips and on structuring gel. It can be used only with a natural Kolinsky hair brush. Adapted to all levels. Polymerization time : two minutes. It does not leave any dispersion film.

- **Arx 50 gr - Art. 2052-** €59,00
- **Arx 5 gr - Art. 2063-** €11,90

Natural light pink of highly fluid viscosity for the three-phase method

Natural light pink of highly fluid viscosity. Ideal for the French manicure. It recalls the brilliant cut of the natural nail. Adapted to all levels. Polymerization time : two minutes

- **Colosseum 50 gr - Art. 2051-** €59,00
- **Colosseum5 gr - Art. 2062-** €11,90

Pale natural pink sealer of highly fluid viscosity for the three-phase method

Pale natural pink sealer of highly fluid viscosity. Ideal for the French manicure. It recalls the brilliant cut of the natural nail. Adapted to all levels. Polymerization time: two minutes.

PROFESSIONAL NAIL LACQUERS

Nail lacquers are the classic choice to embellish the nails. The Gamax nail lacquers line comprises every possible colours: from classic red to all shades of pink, from the brightest summer colours to the darkest and most elegant ones. Creamy, intense and usable until the last drop.

Colour lacquers €3,90

Glitter lacquers €3,90

Pearl lacquers €3,90

NAIL CARE TREATMENTS

Liquids and oils

Nail care treatments are essential to protect cuticles, the nail surface and all the other delicate areas of the fingers. The chemical nail lacquers components or the inevitable effect of time can make nails more fragile. Gamax liquid and oil treatments help preserve the beauty and health of the nails.

- **Tip Blender 14 ml - Art. 1901-** €5,50

Liquid for nail filing

Tip Blender is a liquid which facilitates filing the nail furrow created between the artificial nail and the natural nail in nail extension with tips. The border of the tip will be softer and easier to shape with the file.

- **Top Coat 14 ml - Art. 1903-** €5,50

Liquid to seal nail lacquers

Top Coat is a liquid which seals nail lacquers. It is of dense consistency and protects colour nails and makes them luminous and bright while guaranteeing a better adhesion. It can be used both with natural and artificial nails. **Top Coat** can be applied a few minutes after the lacquer's application and it air dries.

- **Coprente Lucido** (bright coat) 14 ml - Art. 1909- €5,50

Liquid to seal nail lacquers

Coprente Lucido is a liquid to seal nail lacquers. It is of dense consistency and protects colour lacquers and makes them bright and shiny while guaranteeing a long lasting adhesion. **Coprente Lucido** can be applied a few minutes after the lacquer's application and it air dries.

- **Base Coat** 14 ml - Art. 1905- €5,50

Liquid to protect the nail surface from discoloration caused by nail lacquers

Base Coat is a liquid which prevents nail discoloration caused by nail colour pigments seepage. **Base Coat** is an effective protective barrier for the health of the nails. It can also be used on artificial nails. Apply and leave it to dry before applying the lacquer.

- **Lacca Base** (Base Lacquer) 14 ml - Art. 1908- €5,50

Liquid to protect the nail surface from discoloration caused by the nail lacquer

Lacca Base is a liquid which prevents from nail discoloration caused by lacquers colour pigments seepage. **Lacca Base** is an effective protective barrier for the health of the nails. It can also be used on artificial nails. Apply and leave it to dry before applying the lacquer. Opaque pinkish colour.

- **Polish Thinner 14 ml - Art. 1914-** €5,50

Liquid to thin down nail lacquers

Polish Thinner is a perfect thinner for nail lacquers. It gives back the right consistency to the nail lacquer so as to be correctly applied.

- **Ridgefiller Pink 14 ml - Art. 1911-** €5,50

Liquid for nail furrows

Ridgefiller Pink is a natural pink liquid to fill nail furrows which can be present on the nail surface. It can also be used as a strengthener.

- **Pearl Ridgefiller 14 ml - Art. 1904-** €3,90

Liquid for nail furrows

Pearl Ridgefiller is a light pearl liquid to fill nail furrows which can be present on the nail surface.

- **Ridgefiller White 14 ml - Art. 1910-** €5,50

Liquid for nail furrows

Ridgefiller White is a liquid to fill nail furrows which can be present on the nail surface. White colour.

- **Cuticle Remover 14 ml - Art. 1906-** €5,50

Liquid for cuticles

Cuticle Remover is a liquid to soften and hydrate hardened cuticles and ease their removal.

- **Almond Nail Peeling 14 ml - Art. 1912-** €5,50

Nail Peeling with almond fragrance

Almond Nail Peeling is a nail peeling with almond fragrance.

- **Almond Cuticle Oil 14 ml - Art. 1907-** €5,50

Cuticle oil with almond fragrance

Almond Cuticle Oil a cuticle oil with almond fragrance.

SOLVENTS

Nail Solvents

Gamax line of solvents and disinfectants for nails comprises all products for all types of work. Nail solvents, solutions for brushes, nail cleaners, antiseptics for nails and files, solvents to remove the dispersion film after polymerization.
